

ONG KIM HOO

Data & BI Expert · Trainer · Product-minded Builder

I turn messy business processes into clean dashboards, smart automation, and practical digital solutions.

Shah Alam, Selangor • 0195586245 • adexong@gmail.com

♥ PROFILE

Results-driven data and digitalisation professional with 4+ years of experience turning messy business processes into clean dashboards, automated workflows, and decision-support systems. Skilled in Power BI, SQL, Azure, and Power Automate, with a strong record of helping sales and brand teams adopt digital solutions and improve efficiency. HRDF-accredited Train-the-Trainer who delivers internal corporate training, and an active self-learner exploring AI development tools such as Claude Code and Codex to accelerate delivery and workflow efficiency.

♥ SKILLS

Data & BI: Power BI, DAX, Power Query (M), SQL, Tableau, Dashboard Development, Data Modeling, KPI Design, Report Optimisation

Automation & Data Engineering: Power Automate, Talend, BigQuery, Vertex AI, ETL, Reporting Automation, Azure CI/CD

Cloud & Platforms: Microsoft Azure, Microsoft Fabric, Snowflake, SharePoint

Programming & AI: Python, Java, Prompt Engineering, AI Tools (Claude Code, Codex, OpenClaw)

Business & Delivery: Business Process Digitalisation, Stakeholder Management, Cross-functional Collaboration, Internal Training & Facilitation, Requirement Analysis

♥ WORK EXPERIENCE

Nestlé — Data & Digitalisation / BI Analyst

Sept 2023 – Sept 2025

- Supported digitalisation initiatives across multiple business functions to improve operational efficiency and reporting capabilities.
- Collaborated with Sales and Brand teams to translate business requirements into practical reporting and dashboard solutions.
- Developed and maintained key business reports, including sales, salesperson performance, and inventory dashboards.
- Used Azure and Power Automate to support reporting workflows, digital processes, and automation initiatives.
- Optimised SQL queries and backend data processes to improve performance, reliability, and data accuracy.
- Automated recurring analysis and reporting tasks to reduce manual effort, and guided internal users to use Power BI more effectively.

Fraser & Neave, Shah Alam — Junior Data Scientist

Feb 2021 – Aug 2023

- Developed demand-forecasting models and performed market basket analysis to generate business insights and support decision-making.
- Built Power BI reports and dashboards to visualise performance for business users.
- Worked with Microsoft Azure CI/CD, Vertex AI, BigQuery, and Talend across analytics and data-engineering projects.

♥ EDUCATION

University of Malaya — B.Sc. Computer Science (Information Systems)

Sept 2017 – 2021

Nanyang Technological University — Exchange — Nanyang Business School

Jul – Dec 2019

♥ CERTIFICATIONS

- PL-600 — Microsoft Power Platform Solution Architect
- Train the Trainer (HRDF Accredited) — 2025
